Jinhyung Lee, Ph.D.

Postdoctoral Research Associate | Biomedical Engineering | University of Connecticut
jinhyung.lee@uconn.edu | lee-nanomedicine.com | (860) 617-4682

Seeking an Assistant Professor position in Biomedical Engineering

U.S. permanent resident; no visa sponsorship required

Research interests: Biomaterials and nanomedicine; RNA therapeutics; immunoengineering; gene regulation and genome editing.

INDEPENDENT RESEARCH VISION

My independent laboratory will engineer DNA-inspired nanomaterials (called Janus Base Nanomaterial) for RNA delivery and therapeutic immunomodulation. I will study how nanoparticle shape and surface properties influence RNA delivery to immune cells. The program will develop macrophage-targeted RNA therapeutics for rheumatoid arthritis, extend RNA delivery to central nervous system vasculitis, and advance CRISPR-based gene regulation in immune cells.

RESEARCH, FUNDING, AND TRANSLATION

- **Principal Investigator, ORS/Bethel Fellowship ($20,000; 2026–2027).** Evaluating Atsttrin mRNA delivery in patient-derived cartilage-on-a-chip models of osteoarthritis.
  Featured in UConn Today: "Bethel Fellowship Advances UConn Research on Osteoarthritis" (2026).
- **Seven peer-reviewed articles; four as first, co-first, or co-corresponding author.** First author, *PNAS* (2021); co-first author, *Journal of Controlled Release* (2025); co-corresponding author, *Materials Today Advances* (2026).
- **Technology transfer:** Co-inventor of U.S. Patent 12,214,043 B2, licensed by the University of Connecticut to **Eascra Biotech**.
- **Conference presentations:** Invited podium presentation, BMES 2026 (accepted); podium presentation, ORS 2024.

EDUCATION

Ph.D., Biomedical Engineering — University of Connecticut 2024
M.S., Bioengineering — University of California, San Diego 2017
B.S., Convergence Biotechnology — Konkuk University 2015

RESEARCH APPOINTMENTS

Postdoctoral Research Associate, University of Connecticut 09/2024–present
Lead research on targeted RNA delivery for joint disease; collaborate with Dr. Chuan-Ju Liu at Yale School of Medicine on Atsttrin biology.

Collaborate with Dr. Eun Ji Chung at the University of Southern California (USC) on gene editing in the kidney.

Research Assistant, University of Connecticut 08/2019–05/2024
Researcher, Brain Science Institute, KIST 09/2017–12/2018
Graduate Research Assistant, UC San Diego 01/2016–06/2017

TEACHING AND MENTORING

Teaching: Teaching Assistant, Foundations of Biomechanics (BENG 226; graduate level), UC San Diego, 2017; led discussions and developed supplementary materials.

Mentoring: Supervised seven graduate and undergraduate researchers; trainees co-authored four conference presentations.

Teaching interests: Biomaterials; Drug Delivery Systems; Nanomedicine; Tissue Engineering; Introduction to Biomedical Engineering; Biomechanics.
